## True Blue's Policy on Piercing Minors

True Blue will pierce minors with parental consent, if the parent is present and has a photo ID for both parent and child. The last name and addresses must match.

If these requirements cannot be met in shop, our minor consent form must be notarized prior to coming in. We still require photo ID at time of piercing. Our minor consent form can be downloaded from our website ( [www.truebluetattoo.com](http://www.truebluetattoo.com) ) or obtained in shop.

For legal guardianship consent, we require the Original Legal Guardian Court Documents. Again, the guardian must be present, with both ID's following same guidelines as above.

Acceptable Identification includes: state issued ID's, passports, an original birth certificate with seal AND a photo ID.

True Blue approved piercings for minors aged 14 and up include: Earlobes (no large gauge), Helix (outer cartilage), Forward Helix, Tragus, AntiTragus, Rook, Snug, Nostril, Septum, Lip, Beauty Mark, and Eyebrow.

True Blue approved piercings for minors aged 16 and up include: All previous listed plus, Navel, Tongue, Conch, Industrial, Orbital, and Daith.

Any other piercings that have not been listed are considered by True Blue to be Adult piercings only.

All piercings are subject to the discretion of the piercer on duty and we reserve the right to refuse service to anyone.

True Blue feels it is very important for parents/guardians to take their child's health and safety very seriously. That is why our studio follows such stringent guidelines for sterilization and minor consent.

Please note that any and all piercings done on minors can cause significant scarring and that oral piercings can cause permanent dental damage. Discretion should be used by both the parent and minor when choosing any piercing.
